

## OVERVIEW OF SUNSET GECKO

### **Welcome to Sunset Gecko.**

We have a large Beach Front 2 bedroom bungalow ideal for families and honeymoon couples, comfortable A-frame bungalows best for 1-2 people.

Here at the **Sunset Gecko** we are creating a simple environmentally friendly Eco system which can be practiced by anyone.

We enjoy sharing our ideas and are eager to learn new ones so we can all live in harmony with our environment.

### **Accommodation -**

We have a 2-story,2-bedroom traditional wooden house with large balcony, private open-air, fresh water shower and toilet. This is ideal for singles and couples, or groups, located quite literally on the most beautiful pure white sand beach. **Price - Rp. 550,000**

**Also we have simple one room A frame bungalows with balcony, good for 1-2 people with a short walk to shared shower rooms and toilets. Price - Rp. 250,000**

### **Facilities -**

At Our favorite Restaurant, you can enjoy your breakfast lunch or dinner while watching beautiful sunrises over **Lombok's** *mount Rinjani* and sunsets over **Bali's** *Mount Agung*.

### **Here at the sunset gecko -**

**We are creating a simple environmentally friendly Eco system which can be practiced by anyone.**

**We enjoy sharing our ideas and are eager to learn new ones so we can all live in harmony with our environment. We must ALL work to maintain the delicate balance for the benefit of our brothers and sisters and the Gecko's, the ants and the kindred spirit of all human beings.**

**\*Sunset Gecko** is already practicing:

Composting of raw garbage. Production of pure and natural hand made soap. Filtration system for recycling wastewater. Use of Neem oil for: extermination of mosquito/wiggler, protection against insects for flowers/plants. Laundry cleaning ring. Use of naturally decomposing detergent. No air conditioning (Well-ventilated *accommodation* and shade planting). Recycled water storage tank inhabited by frogs, fish, and plants (Biotope). Rainwater collection system. \*Systems we wish to implement in the future:

Solar water heating made by recycled plastic beverage bottles. Wind-generated electricity. System for converting waste plastics into oil. *Coral* revitalization programs involving the local islanders. If you have any

other ideas, etc. regarding environmental technology, please share them with us.

#### **Location -**

if you take a look at our map [\[click here\]](#) we are no 23
